# Bachelor of Arts in Applied Science & Technology

## What is Applied Science and Technology?

Applied science and technology is a multidisciplinary program designed to give a student a broad knowledge base in the sciences and engineering combined with a more in-depth area of focus in another field. This is a broad engineering-oriented degree program, with a breadth of liberal arts, for students who intend to make their careers in fields allied to science, engineering and technology and/or continue their education toward professional careers in law, medicine, business, teaching, or the media. It is designed to help students pursue their goals in a world that relies more and more upon science and technology.

The program can be enhanced with a second major in either the Columbian College of Arts and Sciences (CCAS) or the Elliott School of International Affairs (ESIA). A second major in SEAS is also possible. A concentration in general business through the GW School of Business is also available.

GW also offers a five-year, two-degree program that combines a Bachelor of Arts degree in applied science and technology and a Master of Education in Secondary Education. The applied science and technology degree requires a strong concentration in chemistry, physics,

Human Development (GSEHD).

## Career Paths

This program is ideal for students who are considering careers in areas other than engineering but want the breadth of engineering and science knowledge to set them apart. It also is ideal for those who are considering careers in such diverse areas as education, general science, law, public health, sales, technology management and more.

## Bachelor of Science Degree Program

- Prospective and first-year students: The GW Bulletin carries the definitive curriculum requirements for your degree program. Please visit the Bulletin to find the [B.A. in Applied Science and Technology](#) program requirements.
- All other current students: Please visit the following curriculum sheets to find the program requirements for your degree program. Each student must follow the curriculum in place during his or her year of entry.
  - [BA in Applied Science & Technology 2022-2023](#)
  - [BA in Applied Science & Technology 2016-2017](#)
  - [BA in Applied Science & Technology 2015-2016](#)
